Versatile Modes & Auto Calibration

SQA-iO⁺VU⁺

Overview

The **SQA-iO** is an affordable, compact, web-based automated semen analyzer from Medical Electronic Systems. It is offered at an affordable price point for diagnostic sperm testing and fertility sample preparation.

Incorporating the **WHO 6th** Edition standards and results, the **SQA-iO** delivers Sperm Concentration, Motility, Rapid/Slow/Non-Progressive Motility, Normal Morphology, Velocity, Totals, and more in **75 SECONDS!**

SQA-iO⁺

SQA-VU⁺

The **SQA-VU** is a visualization device that replaces the need for a backup microscope. The SQA-VU interfaces with the **SQA-iO** sperm quality analyzer.

With a user-friendly interface built into the **SQA-iO** workflow, the **SQA-VU** allows for High Definition image/video capture, debris scanning, low quality sample confirmation, Post-Vas analysis and more. The adjustable stage allows for visualization of **50 unique fields of view!**

All-In-One PC Included*

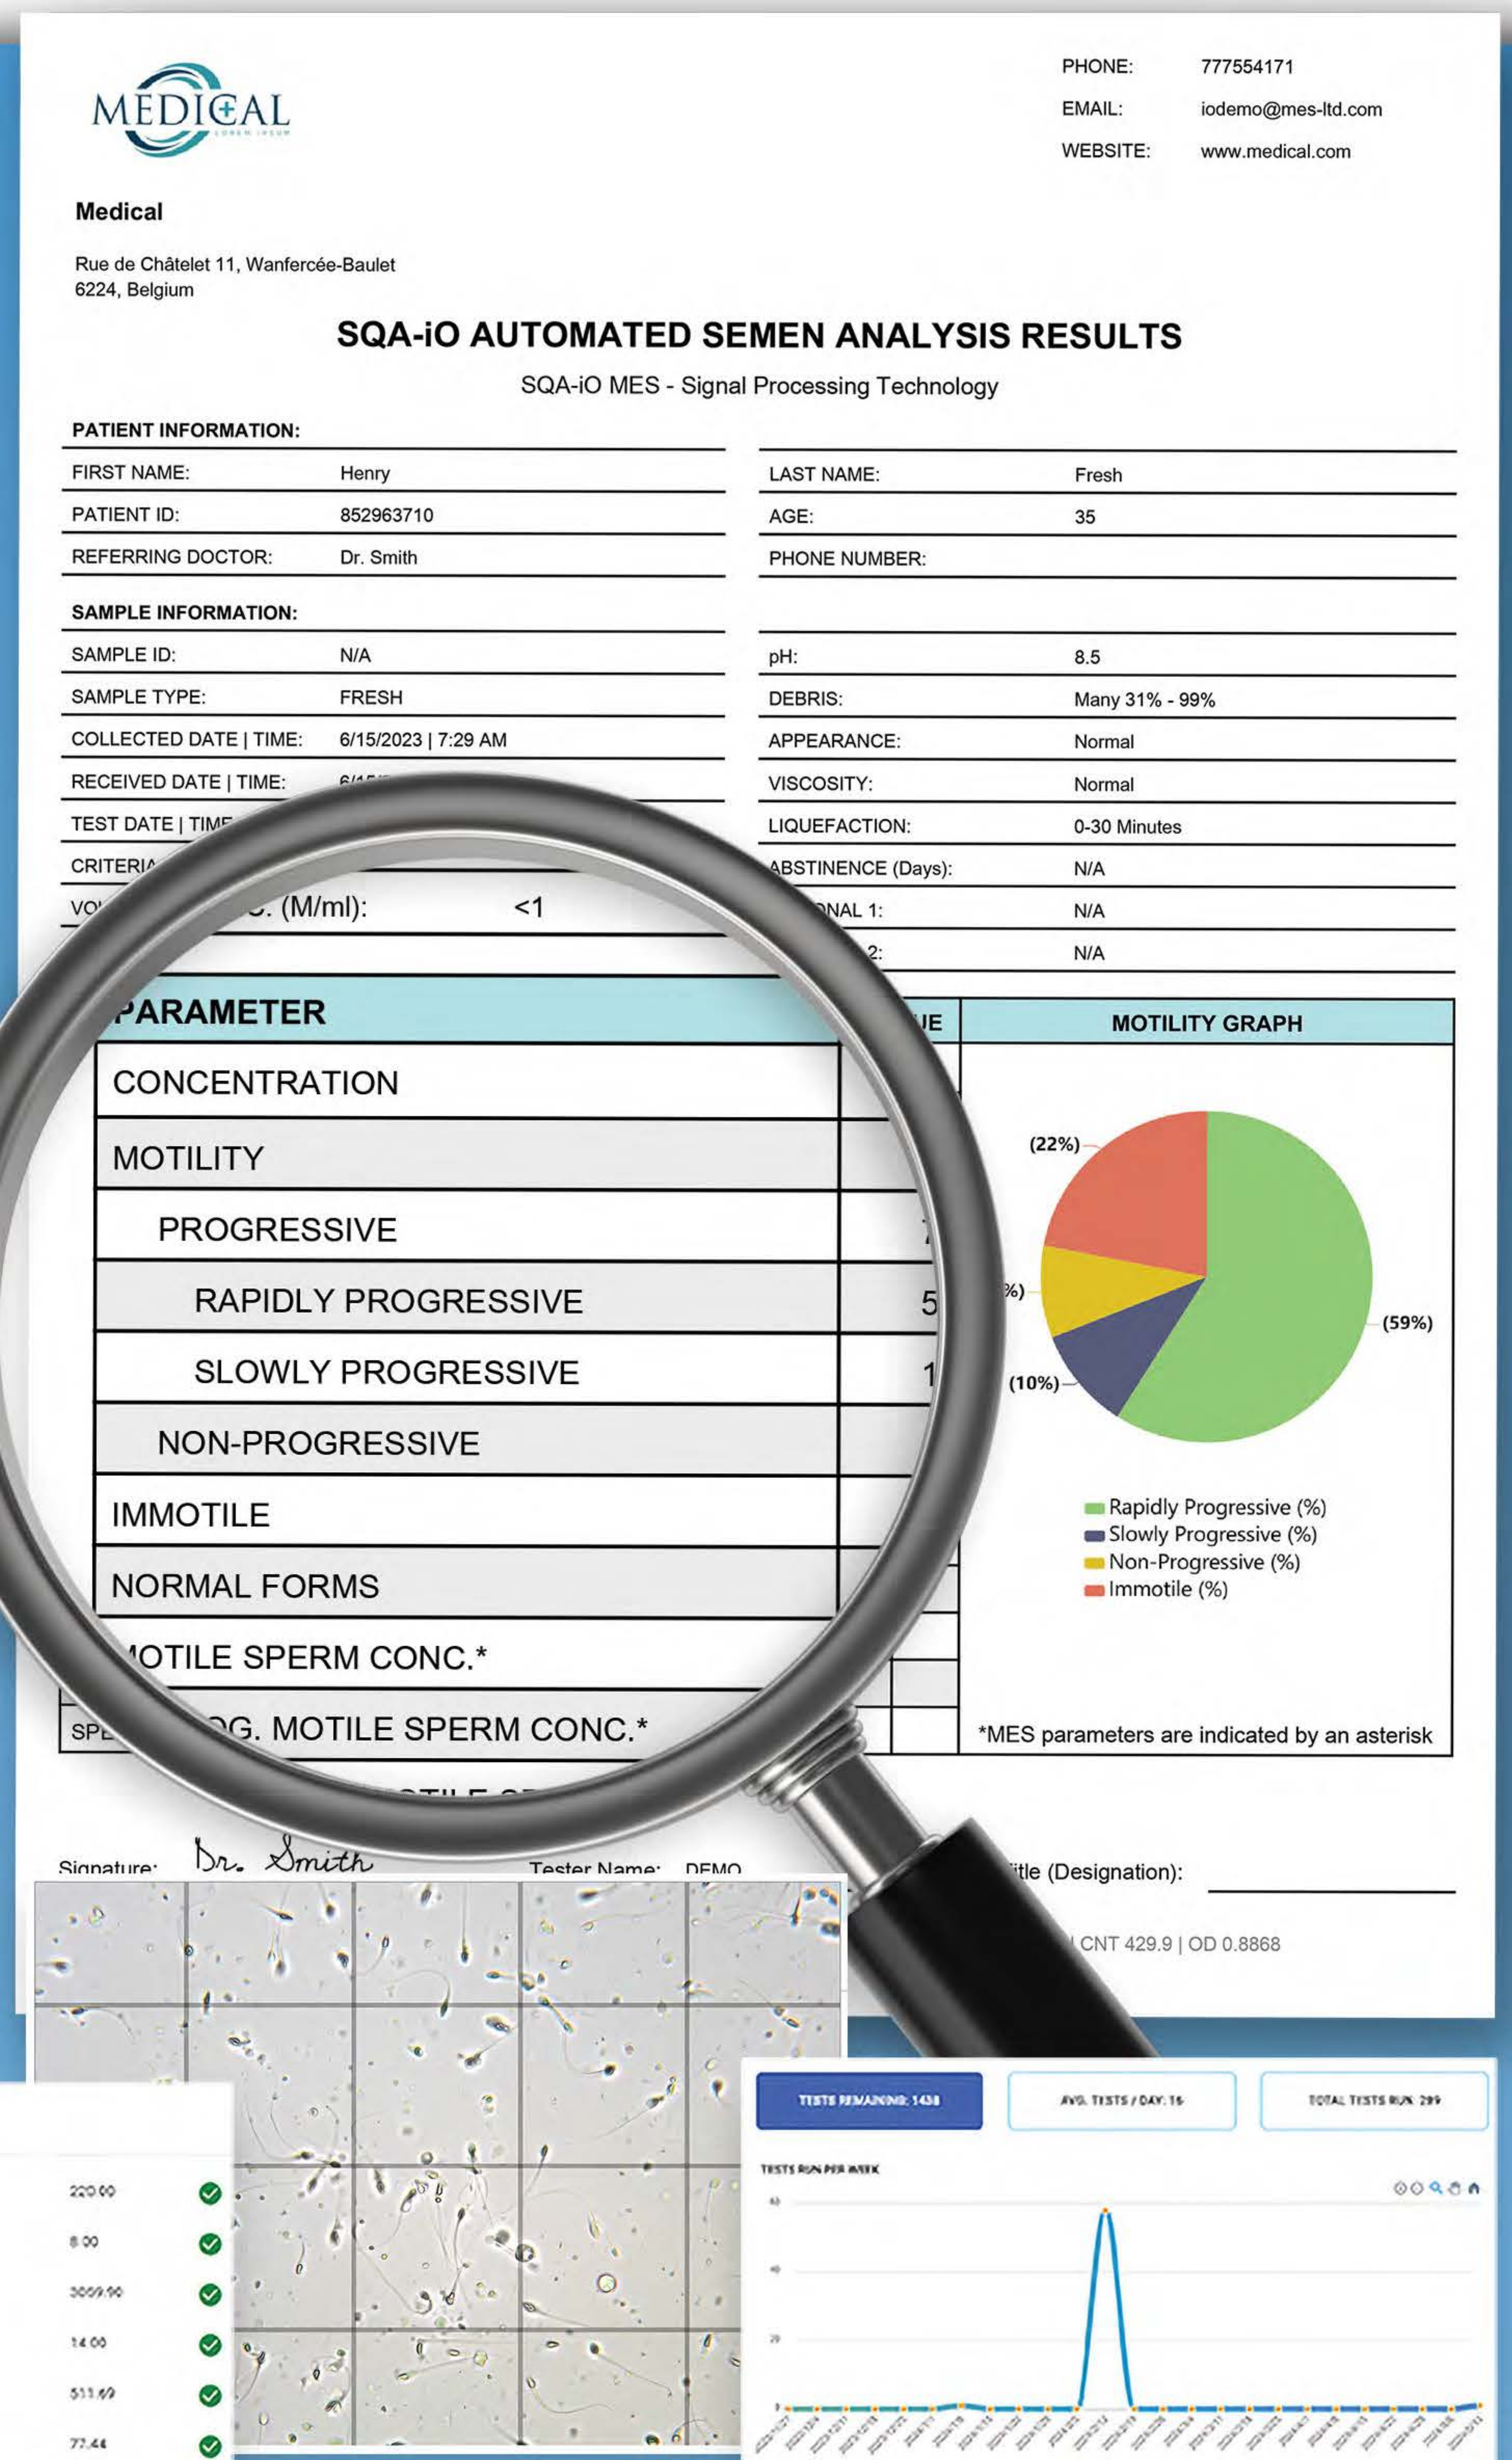

The **SQA-iO** analyzer comes with a pre-configured **All-In-One PC** designed to simplify the setup process for users. This workstation includes all necessary drivers and software, providing a turnkey solution that ensures ease of use.

The **All-In-One PC** enhances the overall experience by providing a comprehensive, ready-to-use solution that supports efficient sperm analysis. ***Available only in the US & Canada.**

Advanced, Integrated, & Precise Analysis
