Re: SQA-V

The SQA-V Semen Analyzer is a dependable and accurate part of our fertility and post vasectomy evaluations. The system is easy to use, with very stable QC and few required reagents to operate. Preventive Maintenance is a breeze, as we simply receive in a loaner from MES and return our unit for service in the same shipping container. I would strongly recommend the SQA-V Semen Analyzer to any facility considering automating their semen analyses.

Sincerely,

Karla M. Blair MT
