To Whom It May Concern,

As the Lead Technologist of our Hematology Department, it has been my pleasure to work with and utilize the SQA-Vision for Semen Analysis. This instrument has standardized our reporting, and decreased the time it takes to perform a complete fertility study. Our staff truly appreciates the ease of use for this instrument, as well as the minimal time it takes to perform the testing.

Our Account Manager at MES is nothing but helpful. He is constantly checking in to make sure we do not need anything, and that things are working well for us. We do not have downtime with this analyzer, so we rarely need to call. I highly recommend the SQA-Vision and MES for your Fertility Study needs.

Sincerely,

A handwritten signature in cursive script that reads "Teresa Sauls".
