

November 08, 2022

The SQA-Vision has been the perfect fit for our laboratory's needs. The instrument is efficient and eases the way of the operator with intuitive software and very little maintenance. The built-in microscope allows us to perform the evaluation of the motility and morphology right at the instrument should we need to. Without this instrument more manual testing and additional staff would be needed to continue to provide fertility testing in our facility.

Sincerely,

Adam Bertsch
